

TRAIN THE TRAINER PROGRAM- ONLINE

English has become the universal language for communication in various fields, such as education, business, and technology. Consequently, the demand for the mastery of this language for various purposes, namely for everyday communication, communication for technical purposes, for research publication purposes and/or networking in academic contexts, has significantly increased. However, teaching English to non-native speakers or using it in the previous contexts can be challenging as it requires specialized knowledge and abilities to facilitate an environment that allows learners to successfully develop their language skills and/or effectively communicate in different settings.

To this end, there are 3 different Train the Trainer themes which participants can choose from. The program can be offered online.

Themes:

1. Teach English as a Foreign Language (TEFL)
2. Content and Language Integrated Learning (CLIL)
3. Intensive English Program for Professionals (IEP)
