INVENTION DISCLOSURE FORM

All information submitted within this disclosure shall be treated as confidential. Lakehead University reserves the right to release disclosed general information for the purpose of generating statistics and for other purposes, as long as such disclosure shall not adversely affect the scope of protection available to intellectual property. If you are a Researcher associated with the *Thunder Bay Regional Health Research Institute* (TBRHRI), you are obligated to also file an Invention Disclosure form to them.

THIS DOCUMENT DOES NOT ASSIGN ANY RIGHT, INTEREST, OR BENEFIT TO LAKEHEAD UNIVERSITY RELATED TO ANY INTELLECTUAL PROPERTY DISCLOSED HEREIN.

Please submit to:

1.

Office of Innovation, Partnerships and Economic Development, FB 2004

955 Oliver Road, Thunder Bay, ON P7B 5E4

Attention: Ellen MacKay, Director, Innovation Development

Email: emackay@lakeheadu.ca

INVENTION AND INVENTOR IDENTIFICATION

Please fully complete all sections of the Invention Disclosure Form. All Incomplete Invention Disclosure Forms will be returned to the inventors without review from the Office of Innovation, Partnerships and Economic Development.

Invention or Software Name:

Submitted by (Principal Investigator(s):					
Faculty & Department:					
Date of Initial Submission to IPED OFFICE:					
Please provide a brief description of the Invention. Kindly attach drawings, reports, papers, or other materials that may aid in your description. In your description, please answer the following:					
a) What is the Invention, and how is it novel?					
b) What is the purpose of your invention? (What does it do?)					
c) Is the invention a process or product?					
d) What is the utility of the Invention?					
e) What problem does the Invention address, and how does it improve on existing methods/products?					
f) What are the physical component(s) of your invention? (Highlight the novel components, if applicable)					
g) What are the limitations of existing technologies, processes, products, or software?					
h) What are the keywords and technical terms that directly describe the nature of your invention?					
Has the Invention/software been tested? If so, how, where, and when?					
Does a model, sample, or prototype exist?					
Are photographs or other forms of audio or visual media recordings available? YES NO					

9.	Provide a description of the development status of your Invention. Describe in terms of bench scale studies, engineering design drawings, prototype development, scaled up proof-of-principle demonstration projects, software code re-working, ongoing development, etc.

SUPPORT OF WORK TO DATE

19. Please indicate all your **funding support** for the research contributing to this Invention. Include any funding applied for (*even formal funding applications that are pending or were denied*), including granting council funding, industry grants, student projects, companies, national or provincial, Research Chairs, individuals, other universities, hospitals, and in-kind commitments of any organization.

Funding Source	Amt Applied For	Amt of Funds Received	Type (i.e. grant/contract)	Project Title	Date
PLEASE LIST					

- 20. Was any of the following **support** used to facilitate the development of this Invention? (*Please circle*)
 - a) University faculty member's regular salary/benefits (worked on Invention during University time)
 - b) personnel, equipment, supplies, and/or facilities funded by regular departmental operating budgets
 - c) ordinary use of the library and centralized computing facilities
 - d) research equipment and supplies obtained through grants in aid of a faculty member's work

21.	Was any other support received from Lakehead University to facilitate the dev	any other support received from Lakehead University to facilitate the development of this		
	Invention? (If "Yes," please elaborate)	YES 🛑	NO 🔵	

OWNERSHIP/INVENTORSHIP ISSUES

Please give personal particulars for **all persons** listed in this section in **Acknowledgement** (last page).

NOTE: Whether or not someone is an "inventor" must be determined according to patent law. Failure to include all inventors or including someone who is in fact not an inventor, could result in serious commercial damage and even potential invalidation of a patent. The Canadian University Intellectual Property Group discusses the issue:

"An inventor is a person who has had an original idea or has contributed intellectual input to one of the main claims of the patent. A patent application may be filed naming one or more inventors.

A person who works under the direction of another and does not contribute any original thought to the claimed invention; for example, "works as a technician" to confirm an invention, **cannot** and **must not** be named as an inventor. This type of relationship should be delineated clearly in writing before research or development work is undertaken relative to the project or activity.

Professional collaborators may or may not contribute to the inventive concept being claimed and great care should be taken in deciding who should be named as an inventor. It is important to understand that inventorship is a legal matter, not a collegial matter -- not all co-authors of a publication are necessarily co-inventors. Collaborators not deemed to be co- inventors can however be recognized through some sharing of the net proceeds of the invention. If in doubt as to inventorship, your Intellectual Property Management Office should be consulted and a professional opinion obtained."*
