ANDROID DEVICES WIRELESS

Open your **Settings** app and access the **Wifi connections** menu.

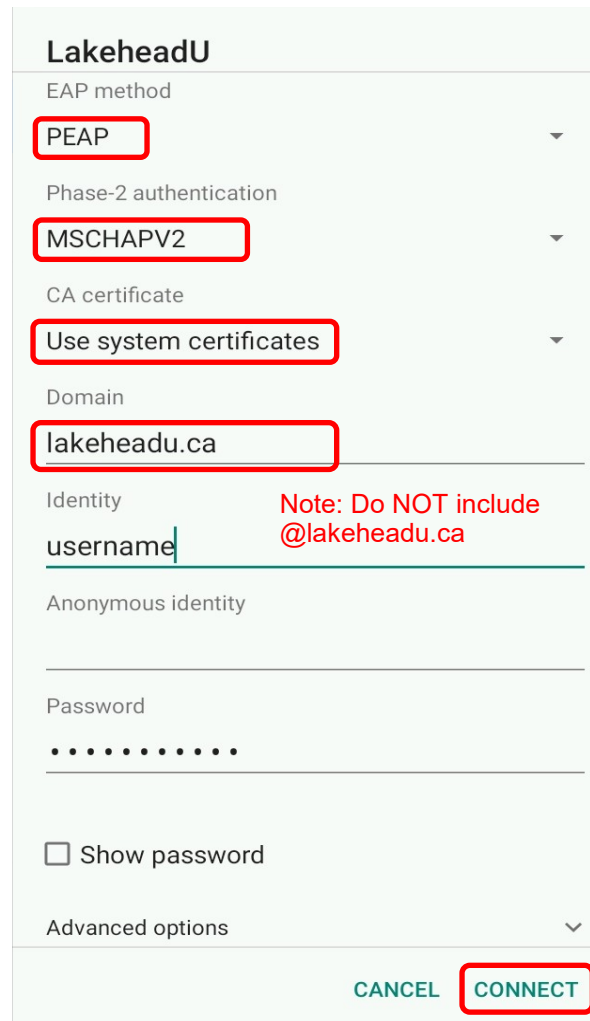

Select LakeheadU from the wireless list.

EAP should be: **PEAP**
Phase-2 authentication should be:
MSCHAPv2
CA Certificate should be: “**Use system certificates**”
Domain should be: **lakeheadu.ca**

Enter your Lakehead username and password, then click connect.

Note: Some versions of android will require users to click on “advanced options” at the bottom of the screen to enable the MSCHAPv2 setting.

Note: If the instructions on the previous page worked, you can ignore this page.

Some older versions of android will not have the option for “Use system certificates”. If this occurs, selecting “Do not validate” and entering your credentials should allow you to connect.
